- 6. Make some beats!**

# Installation on MacOS

---

1. Copy the Casseta N90 Samples folder to place where you want to store the samples.
2. Open Casseta N90 Installer and follow installer steps.

---

Our all plugins are signed by Apple Developer Account but sometimes you can see error about untrusted developer. If you encounter such a problem please follow these directions.

1. In the Finder on your Mac, locate the app you want to open.
2. Don't use Launchpad to do this. Launchpad doesn't allow you to access the shortcut menu.
3. Control-click the app icon, then choose Open from the shortcut menu.
4. Click Open.
5. The app is saved as an exception to your security settings, and you can open it in the future by double-clicking it just as you can any registered app.

You can also grant an exception for a blocked app by clicking the Open Anyway button in the General pane of Security & Privacy preferences. This button is available for about an hour after you try to open the app.

To change these preferences on your Mac, choose Apple menu > System Preferences, click Security & Privacy, then click General.

## **IMPORTANT : ALTERNATIVE INSTALL METHOD**

***If you don't succeed in running the Installer please do the following :***

- 1. Download and Extract "Casseta N90 VST Alternative MAC.zip"**
- 2. Go to your Macintosh HD => Library => Audio => Plug-Ins and copy there Casseta N90 VST .Component and/or VST file to proper folder (Component or VST).**
- 3. Copy Casseta N90 VST Samples folder wherever you want and remember this place. If you can store samples on SSD.**
- 4. During initial plugin opening you'll be asked to select folder with samples.**
- 5. Restart plugin.**
- 6. Make some beats!**

# First Run

When you run the plugin for the first time, you will be asked to select the folder where the samples were copied.

Click on Choose Sample Folder button and select folder where you install Studio Heat Samples

After selecting the samples folder you will get information
